1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
3. The abstract of the disclosure is objected to because the abstract does not set forth the nature and gist of the invention.

Correction is required. See MPEP § 608.01(b).

4. Claims are objected to because of the following informalities:

In claim 8, the subject matter in the last paragraph of this claim is not clearly understood; the phrase "a reduced degree of reflection" is also unclear;

In claim 12, the phrase "behavior of a vehicle" is not positively recited; the subject matter in the last paragraph is not clearly understood.

Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Inoue et al. (5,541,859).

As to claims 1,4-7,13, Inoue discloses a magnetic rotation detector with a magnetic rotor 12, a detecting body 13 and an abnormality determination portion 142, col. 18, lines 23+ (fig. 1).

As to claims 2-3, the detector 13 detects the occurrence of the fluctuation due to the positions of the magnetic body 12 (fig. 1).

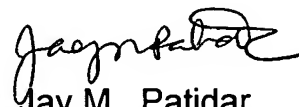

As to claims 8-12, Inoue discloses at Col. 20, lines 23+ a vehicle control system to determine the rough state of a road surface to exclude the wheel speed detected as abnormal by the rotation sensor.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note PTO-892.
